

# POPIMS 2017 Update

Nathan McWilliams

Director of Technology/Trauma Registry

# NO SPECIFIC POPIMS UPDATES!

- Will still be changes based on the COLLECTOR™ changes
- Manual will be updated to reflect COLELCTOR™ related changes
- **WHY NO UPDATES?**
  - Moving to a new platform in 2017

# New Platform, New Name

- New Name = PA V5 Outcomes
- Captures basically the same data
- Adds flexible screens for utilizing taxonomy
- Eliminates the Death Audit tab

# Timeline to New Platform

- December 2016-April 2017
  - Data set and functionality finalization
  - Testing and feedback
  - Interface development and testing
- May 2017-July 2017
  - Final production
  - Install development
  - Deployment planning
  - Training
- July 2017
  - Go Live with PA V5 Outcomes and Report Writer

# Content the same, Look is different

- Tabs on the bottom are gone, but rolled into two tabs at the top
- Patient summary content is the same, still pulled from Collector

Trauma Data Editor

Patient Summary | PIPS

Patient Information | Response Times | Procedures | Diagnosis

Facility 0 Staff Trauma # 20160002 Linkage # M000476698 Medical Record # D900005585

PTOS Patient  PTOS Trauma Registry Status  Abstractor

Patient Name: Last Cash First Johnny MI  Suffix

Date of Birth 05/18/1944 Age 71 in 1 Years Gender 1 Male Injury 03/03/2016 @ 12:17

Primary Mechanism V47.52XA Driver of other type car injured in collision with fixed or station Cause Of Injury THE PATIENT WAS THE DRIVER OF A VEHICLE WHICH HIT A TELEPHONE POLE. HE BELIEVES HE MAY HAVE FALLEN ASLEEP.

Injury Type 1 Blunt

Scene ?? ?? PCR 00116002463

Transport  PCR

Referring Facility  Transport  PCR

Entered ED 03/03/2016 @ 13:00 ED Discharge 03/03/2016 @ 17:15 Post ED Destination 4 ICU/Critical Care Unit

Trauma Alert Change  Admitting Physician

Revised Level of Alert / N/A Trauma Attending Physician

Initial Assessment

Paralyzing Drugs?  Intubated?  SBP/DBP 166 / 130 Pulse 89 GCS (E/V/M) 3 3 2 Total 8

Resp Rate Controlled?  Unassisted Resp Rate 30 RTS 5.676

MTP  Location  Initiated  Administered

Discharge Status 2 Dead Discharge/Death 03/14/2016 @ 13:08 Total Days: ICU 9 Step Down  Ventilator 9 Hospital 12

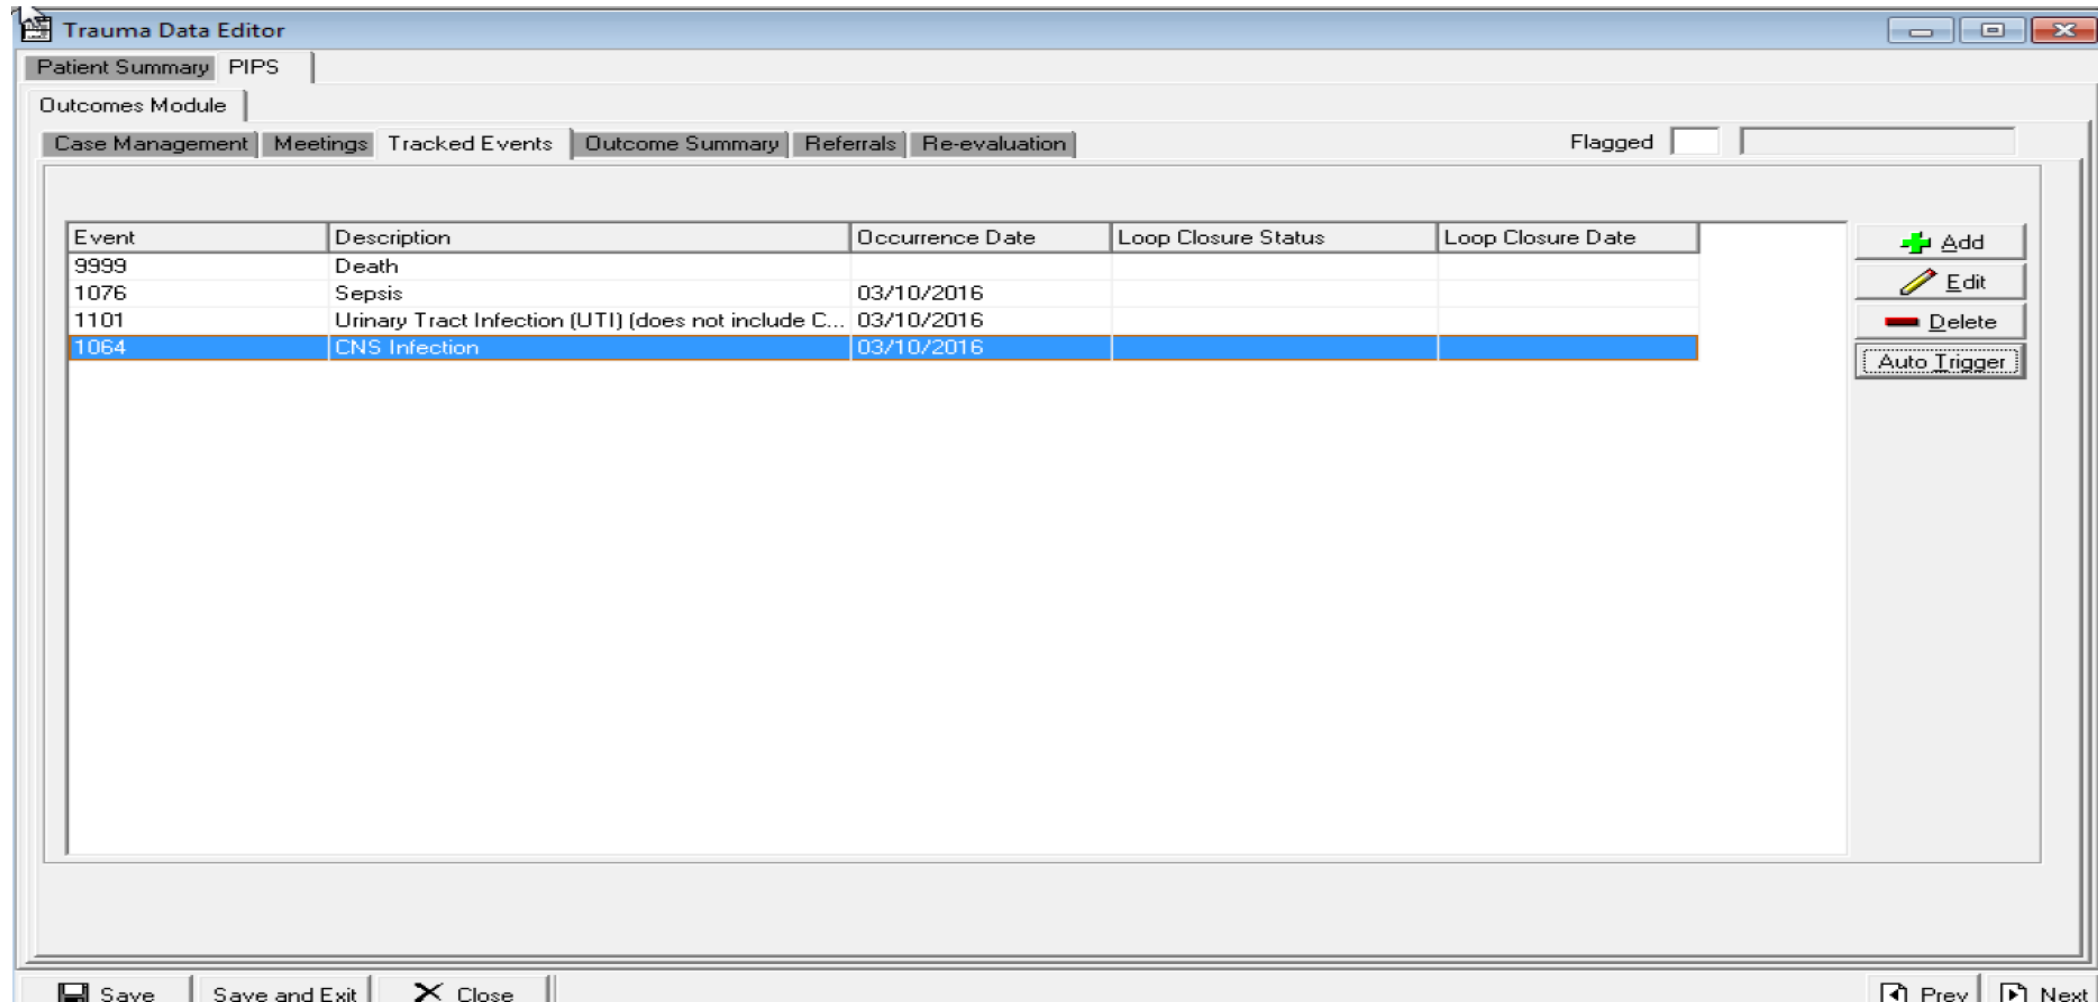

Discharged To  Comment  Discharge to Facility

Diagnosis: ISS 21 TRISS 0.655 Burn: 2nd 3rd Tot P(s) Alt P(s)

MULTIPLE RIGHT RIB FRACTURES  
COMPRESSION FRACTURES OF T7, T8

# Content the same, Look is different

- The PIPS tab will contain your current tab 2 through 8
- Current tabs 4,5 and 6 combined into Tracked Events tab

The screenshot displays the 'Trauma Data Editor' application window. The interface includes a menu bar with 'Patient Summary' and 'PIPS', and a sub-menu 'Outcomes Module' with options like 'Case Management', 'Meetings', 'Tracked Events', 'Outcome Summary', 'Referrals', and 'Re-evaluation'. A 'Flagged' checkbox is visible. The main area contains a table with the following data:

| Event | Description  | Occurrence Date | Loop Closure Status | Loop Closure Date |
|-------|--|-----------------|---------------------|-------------------|
| 9999  | Death  |                 |                     |                   |
| 1076  | Sepsis   | 03/10/2016      |                     |                   |
| 1101  | Urinary Tract Infection (UTI) (does not include C... | 03/10/2016      |                     |                   |
| 1064  | CNS Infection  | 03/10/2016      |                     |                   |

On the right side of the table, there are buttons for '+ Add', 'Edit', 'Delete', and 'Auto Trigger'. The bottom of the window features a toolbar with 'Save', 'Save and Exit', 'Close', 'Prev', and 'Next' buttons.

# Change is scary!

- Training on the new screens will come in 2017
- Taxonomy will not be required on every issue, but will be optional based on the users choice

- Questions
